About Us

Our Journey

From a 55 m² shop in 1977 to a 40,000 m² sustainable facility exporting to over 100 countries—our journey is driven by growth and innovation.

About Us

Our Journey

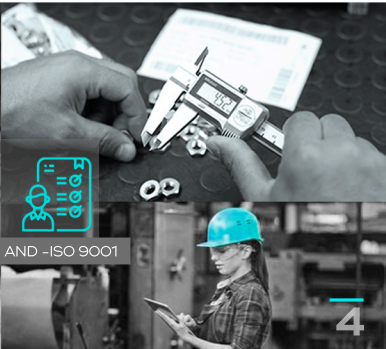

With our reconfigured production facility, which uses a concrete production approach, we produce products that respond to different market and customer needs and act according to the principle of "continuous improvement."

About Us

We Value Your Thoughts

We bring each product through more than 50 tests, from consumables to spare parts, from chassis to electrical components, and control it to the smallest detail. In short, *"We Value Your Thoughts"*.

CE - TSE - HYB - AND - ISO 9001

About Us

We Value Your Thoughts

We constantly improve ourselves with the philosophy of "innovation." In the context, we use technology in every area, including R&D, sales, after-sales support, and manufacturing, and we are even pioneers.

About Us

Sustainability

We train our staff and business partners on our ever-evolving products and customer requirements and organize additional programs to train new human resources.

About Us

Sustainability

Our production facility, built using green building technology, uses nature's resources at the highest level and contributes to sustainability with the "Zero Waste" principle

Yilmaz Academy

Vision & Future Plans

At Yilmaz Machine, our Academy Department plays a key role in shaping the future of both our team and our technology.

Looking ahead, the Academy is actively involved in supporting the development of our next-generation machinery.

With a focus on innovation the department collaborates closely with R&D to provide technical insights and feedback.

These efforts will help us introduce smarter and user-friendly machines for our customer needs.

In addition to technical development, the Academy also continues to expand its online training programs. The main goal of the academy is to educate sales teams, machine operators, fabricators, dealers, and the Yilmaz service team.

These sessions are designed to provide accessible, high-quality education to our global network of partners, technicians, and customers.

After Sales Support

Our After-Sales Support Department is dedicated to delivering reliable, fast, and solution-oriented service to our customers worldwide.

We believe that a machine is only as good as the support behind it. That's why our team works proactively to ensure customer satisfaction long after the initial delivery. From remote technical assistance to on-site service, we provide comprehensive support throughout the machine's lifecycle.

Product Schema

We produce a total of 65 machines for aluminum, across 10 main categories and 23 subcategories.

For PVC, we produce a total of 56 machines in 11 main categories and 27 subcategories.

We produce a total of 121 different product models for aluminum and PVC.

ALU	Machining Centers	Cutting	Milling	Corner Crimping	End Milling	Pressing	Transferring	Conveying	Swarf Extraction	Assembling
	9	20	4	3	5	4	9	4	2	5

PVC	Machining Centers	Cleaning	Cutting	Milling	End Milling	Screwing	Welding	Transferring	Swarf Extraction	Conveying	Assembling
	3	5	11	5	3	4	4	9	2	4	6

Product Range

ALUMINIUM & PVC MACHINING CENTERS

We produce a total of 12 machine models in 3 sub-categories in PVC and Aluminium Profile Processing Machines.

Profile Machining & Cutting Center
Sheet Plate Machining Center
Four Head Welding & Cleaning Line

Product Range

CUTTING

We produce in the following 9 sub-categories.

- Double-Head Cutting
- Single-Head Cutting
- Radial Cutting
- Glazing Bead Cutting
- Reinforcement Sheet Band Saw
- Reinforcement Sheet Circular Saw Cutting
- Slicing Machine
- V Cutting
- Portable Cutting

Product Range

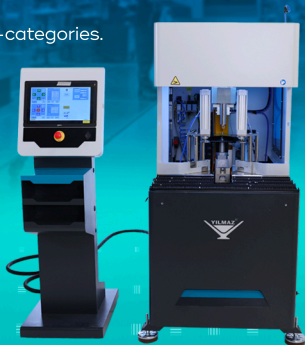

CLEANING

We produce in the following 3 sub-categories.

CNC Corner Cleaning

Manual Corner Cleaning

Window Gasket Milling Machine

Product Range

MILLING

We produce in the following 3 sub-categories.

Numerical Control (NC) Router

Template Copy Router

Portable Copy Router

Product Range

CORNER CRIMPING

We produce in the following 3 sub-categories.

CNC Automatic Corner Crimping

Hydraulic Corner Crimping

Pneumatic Corner Crimping

Product Range

END MILLING

We produce in the following 3 sub-categories.

Semi Automatic End Milling

Portable End Milling

Facade Notching Saw

Product Range

SCREWING

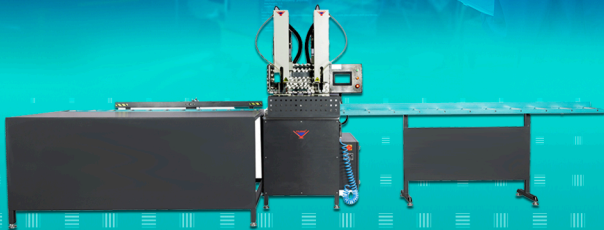

We produce in the following 4 sub-categories.

Double Head Reinforcement Steel Screwdriver

Single Head Reinforcement Steel Screwdriver

Double Head Reinforcement Steel Screwdriver & Montage Drilling

Automatic Mullion Connector Assembly Machine

Product Range

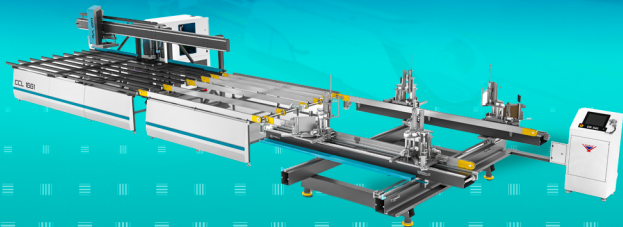

WELDING

We produce in the following 3 sub-categories.

Double Corner Welding

Four Corner Welding

Single Corner Welding

Product Range
